

# SCREW POINTS

## Self Drilling Screw

Drilling point that will drill through metal.

## Type 17

A thread cutting screw for wood with a coarse screw thread and a long sharp point fluted to capture chips.

## Dual Point

Dual point screws are made especially to screw into timber and metal.

## Series 500

Extended drill points for screwing into thick metals.

## Self Tapping Screw

A thread forming screw with coarse thread for use in thin metal.

## S-Point or Self Piercing Point

Produces more secure sheet metal assemblies. These are also known as a needle point, speed points or sprint points.
